The Prince Collection Makes a Return

AFTER A HIGHLY SUCCESSFUL JANUARY AUCTION SHOWCASING 'THE PRINCE COLLECTION'; WE ARE THRILLED TO ANNOUNCE THE ARRIVAL OF MORE OF HIS EXQUISITE ITEMS IN OUR UPCOMING AUCTION.

The items from "The Prince collection" come from vast collections spanning the globe, showcasing cultures including Egyptian, Roman, Greek, and Western Asiatic. Our highlight items have strong provenance, having been in the possession of notable figures, such as Hans Geodicke and his Foundation of Egyptology. He had a remarkable collection of ancient artifacts unearthed by the late Hans Geodicke during his excavation at Abu Simbel, a very significant historic site. Geodicke curated these artifacts with the intention of establishing the Egyptology Foundation, dedicated to the study of the site and broadening the scope of Egyptian history. Some pieces from his collection were subsequently sold to generate additional funds for new archaeological discoveries. Whereas others were generously donated to support the advancement of Egyptian philology, epigraphy, art, and history, spanning from the early Old Kingdom through to the Roman period.

Additionally, some pieces originate from, The Egyptian Exploration Society. Formerly known as the Egyptian Exploration Fund (EEF), which was established by Amelia Edwards and Reginald Stuart Poole with the primary objective of exploring, surveying, and excavating in Egypt.

And finally, we have some spectacular pieces coming from Dr. Schmidt who was an art collector, celebrated for his discerning taste in antiquities. His family had a distinguished reputation for amassing ancient artifacts and he inherited a substantial collection. Much of their collection had been acquired from the Barbier-Mueller family, esteemed collectors with a legacy spanning over a century.

Here are some pieces we are particularly excited to host in our upcoming April Auction:

A beautiful Egyptian Amarna Period Sandstone Relief Depicting A Pharaoh Worshipping The God Aton (Lot 2): This piece portrays an iconic scene of Pharaoh Akhenaten in prayer to the god Aton, with the rays of the disc deity extending to bestow life and power. Akhenaten was a believer in the god Aten, evidenced by his change of name from Amenhotep IV to Akhenaten and his abandonment of the worship of Amun. He went as far as dismissing other Pharaohs and their beliefs, asserting that the worship of Aten should have always been paramount. Engraved in the distinctive style of the Amarna Period, characterized by exaggerated features, this piece holds significant cultural and historical meaning, making it a remarkable addition to any collection.

Another piece that has withstood the test of time is A Rare Greek Terracotta Snake (Lot 28). Snakes held profound significance in Greek symbolism, often representing themes of renewal and rebirth as they shed their old skin. This terracotta snake likely carried ritual importance and would have been ceremonially placed in a temple dedicated to the Greek god Asclepius. This reflects the ancient Greek belief in the healing powers associated with snakes.

Lastly, Lot 745 - Sumerian Copper Cups With Animal Protomes: showcase exquisite depictions of birds of prey and bulls. The first cup is decorated with bulls symbolising good fortune, protection, and fertility, often serving as guardians at temples. The other copper cup is adorned with multiple protruding birds, possibly representing the storm bird, Anzu. Drinking from these cups would have been associated with blessings for continued prosperity and security. These pieces were likely used in ritual contexts, imbuing ceremonies with symbolic significance.

Fine Ancient Art & Antiquities

Saturday, Sunday, April 27th - 28th, 2024 at 12:00 P.M. GMT

Apollo Art Auctions is presenting the “Fine Ancient Art and Antiquities” A two-day auction which will be held on the 27th and 28th of April 2024.

Why not bid live at our auction showroom located in the heart of central London, at 63-64 Margaret Street, W1W. If you are unable to participate in person, make sure to register via our auction platform auction.apolloauctions.com.

Our April auction brings an exceptional selection of antiquities, encompassing a wide range of cultures such as Ancient Egypt, Ancient Greece, Rome, Western Asia and China. The items also boast notable provenances linked to collectors such as; Mrs B. Ellison, who was a member of the Egyptian Exploration Society and a recognised collector of Egyptian Antiquities.

Moving on to Axel Guttmann who was a well-known private collector of European weapons. His collection began with a Roman Bronze helmet and grew rapidly to over 1,000 pieces. Known for lending his collections for exhibitions and providing accessibility to researchers, Guttmann’s collection was auctioned following his passing in 2002 and 2004.

One of our highlight pieces of the auction is Lot 41 (New Kingdom Egyptian Tall Wooden Ushabti of Sethi I) coming from the collection of Arthur Bowen Davies who was Modernist American Artist. While not widely recognized as a collector of ancient artifacts, Davies collaborated with prominent American societies such as the Rockefellers, assisting them in establishing their own collections. He frequently travelled to Europe for inspiration, particularly drawn to ancient classics, which likely fuelled his interest in Ancient Art.

The second day of the auction also features a selection of seals that have been seen by the esteemed Professor Wilfred George Lambert. Professor Lambert, a collector and lecturer at Birmingham University for many years, dedicated his career to the study of Near Eastern history, with a particular focus on cylinder seals. His extensive literature on the subject is widely recognized and is grounded in a thorough background of knowledge.

Each piece was selected by our team of experts and auction curators, offering you the opportunity to enhance your collection.

With our April auction we welcome our new consultant Alessandro Neri, who specialises in Medieval and Classical antiquities. Alessandro studied in the university of Barcelona and Padua completing courses in early Medieval Archaeology, Archaeometric Analysis, Anthropology of Fakes, Art Collecting, Authentication and Innovative Tools for a Culture of Legality in Cultural Heritage. He has worked as a consultant and curator for multiple galleries and auction houses as well as private collectors.

Here are some highlights to look forward to;

3. NEW KINGDOM EGYPTIAN RELIEF DEPICTING A HIGH OFFICIAL

Starting Price:

NEW KINGDOM, XVIIIth DYNASTY, REIGN OF AMENHOTEP IV-AKHENATEN, CA. 1353 - 1336 BC

£8000

A sandstone relief depicts a high official originally sitting in front of a balance. He is depicted according to the new artistic canons: feminine breast, prominent belly, long and expressive face, thin arms with long hands and tapering fingers. His right arm is raised in a gesture of command, and his left arm is bent at elbow, with the hand gripping a scribe's writing palette. The man wears a transparent robe and thickly wavy wig, typical elements of clothing in Amarna Period. A hieroglyphic text divided into four columns shows the titles and the unfortunately incomplete name of the person. However, it is possible to reconstruct his name both based on the hieroglyphs, albeit incomplete and based on the titles: he is probably Huya, a high official of Pharaoh Akhenaten and steward of Queen Tiye, Pharaoh's mother. Behind the figure of Huya we can see the bust of a standing figure with a shaved head, represented in smaller dimensions than Huya. The column of hieroglyphs above it shows only his name: Meh, he was probably a servant of Huya. Along the right side, the fragment has a raised edge, which allows us to affirm that it comes from the corner area of the wall of a tomb. The relief fragment was part of a larger scene of weighing the gold of the tributes, an activity in which Huya in his function of "Overseer of the Double Treasury" presided. The piece is dated to the late New Kingdom, precisely during the reign of the "heretic Pharaoh" Amenhotep IV-Akhenaten (1353-1336 BC). In addition to revolutionising Egyptian religion, by imposing the cult of the solar disk Aten, he gave impulse to a new artistic style, characterised by exaggerated forms, called 'Amarna art' by scholars, from the name of the village of Tell el-Amarna, in Middle Egypt, the place where stood the ancient city of Akhetaten "Horizon of the Sun-Disk", founded by Akhenaten to be the new capital of Egypt. For similar see: *La storia della scultura del Mondo, Egitto* 1978, p. 146 fig.2. This piece is accompanied by a report from Simone Musso, consultant curator for Egyptian antiquities at the Stibbert Museum, Florence, Italy, member of the Nuri Archaeological Expedition.

Provenance: Property of a London collector; formerly with Mayfair family S. A., acquired from a London professor in the late 1970s. This item has been cleared against the Art Loss Register database and comes with a confirmation letter.

Size: 420mm x 410mm; Weight: 9.15kg

Should any provision of these Conditions of Business be deemed unenforceable for any reason, the remaining provisions shall remain in full force and effect.

Terms & Conditions of Bidding Apollo Art Auctions LTD

10.6 These Terms and Conditions are not assignable by any Buyer or Seller without Apollo Art Auctions' prior written consent but are binding on the Buyer's and the Seller's respective successors, assigns and representatives. No act, omission or delay by Apollo Art Auctions shall be deemed a waiver or release of any of its rights.

10.7 The Contracts (Rights of Third Parties) Act 1999 is excluded by these Terms and Conditions and shall not apply to any contract made pursuant to them.

10.8 The Terms and Conditions, the Terms of Consignment for Sellers, and any additional notices issued by Apollo Art Auctions form the entire agreement between the parties. It is agreed that no party has entered into any contract pursuant to these terms in reliance on any representation, warranty or undertaking not expressly referred to in these documents (save in respect of liability for fraudulent misrepresentation).

10.9 These Terms and Conditions, including the Terms of Consignment for Sellers, and all transactions or disputes to which they relate, are governed by the laws of England and Wales. The Buyer and the Seller agree that the Courts of England and Wales shall have exclusive jurisdiction in relation to any dispute arising.

Date of Sale: the date on which we accept the Buyer's Bid for the Lot.

Deliberate Forgery: an imitation made with the intention of deceiving as to authorship, origin, date, age, period, culture or source but which is unequivocally described in the catalogue as being the work of a particular author, origin, date, age period, culture or source, and which at the date of the sale had a materially lesser value than it would have had if it had been in accordance with the catalogue description.

12. Lots

12.1 Apollo Art Auctions' knowledge in relation to any Lot is primarily dependent on information provided by the Seller of the Lot. Although we carry out in-house due diligence on each lot, bidders must accept the responsibility for carrying out inspections and investigations to satisfy themselves as to the Lots on which they bid.

12.2 Lots are offered as seen and are available for inspection prior to auction at our premises. It is the responsibility of Bidders to make any enquiries before the auction date and satisfy themselves as to the accuracy and authenticity of any Lot and in relation to the description of any Lot, including but not limited to a Lot's condition, quality, provenance, authenticity, background, style, period, age, origin, value and estimated selling price. Although we carry out in-house due diligence, we have no obligation to examine, investigate or carry out any tests to establish the accuracy or otherwise of any description whether on the Website or in any printed material. If any Lot is provided with a TL test it means that the Lot was examined using an advanced scientific Thermoluminescence dating method which is used to evaluate the period of manufacture of the lot but it doesn't exclude the possibility of restoration and repairs. The same applies to XRF testing and any other type of scientific analysis provided for the lots.

12.3 Sale catalogues, catalogue illustrations, condition reports and any descriptive certificates are for information purposes only and do not necessarily convey the full information regarding any Lot. Information provided to Bidders or their advisors prior to the sale in respect of any Lot, whether written or oral and including any information in the sale catalogue or condition or other report, is a statement of opinion honestly held by Apollo Art Auctions and is not a statement of fact. Our description of any Lot, including details of the age, value, authenticity, ownership, history, use and condition, reflect our opinion only and we therefore do not warrant any information provided to Bidders in relation to the Lot.

12.4 The nature of the Lots sold at auction by Apollo Art Auctions is such that they are likely, due to their nature and their age, to show signs of wear and tear, damage, or other imperfections, restoration or repair. Any reference to condition by Apollo Art Auctions will not amount to a full description of condition. Photographs included in Apollo Art Auctions' sale catalogues are not representative of the condition of any Lot.

12.5 We may describe the Lots using the following descriptions:

Restored: the Lot may have been repaired or otherwise reinstated and some parts may have been replaced;

Fair Condition: the Lot may be fragmentary or have some obvious damaged;

Fine Condition: the Lot is likely to be generally complete but may have minor damage or evidence of restoration or repair;

Very Fine Condition: the Lot is usually complete and in good condition, but may have some minor damage, restoration or repair.

Possibly later: the term refers to an item that can be from any given period.

12.6 We will provide a report on the physical condition of any Lot on request. The content of a report is information only and should not be relied upon as advice. For coins that have been authenticated, graded and encapsulated ('slabbed') by an independent grading company, no guarantee of any kind is offered by us. Buyers should note that removal or attempted removal from any slab will immediately void any independent guarantee that might have been offered by that grading company.

12.7 All dimensions of Lots are approximate and are for general guidance only. A single dimension given is normally the greatest dimension for the Lot.

12.8 Subject to the conditions set out in this clause 3, Apollo Art Auctions exercises reasonable care when making statements of opinion consistent with its role as a regional auction house, based on information provided by the Seller, available scholarship, and the generally accepted opinions of relevant experts (at the time any such expert expressly states such opinion). We are in no way required to seek the opinion of any expert outside Apollo Art Auctions.

12.9 It is the Bidder's sole responsibility to identify and obtain any necessary licences for a Lot, including but not limited to export, import, or endangered species. Apollo Art Auctions and the Seller make no representations or warranties as to whether any Lot is or is not subject to export or import restrictions. The denial of any licence or permit shall not entitle the Buyer to cancel the sale contract or delay payment of the Lot.

12.10 We reserve the absolute right to withdraw any Lot from sale for any reason.
